

Demi-Diamond™

Fruit Fly Monitoring System

Key Features:

- A versatile, cost effective flying insect monitoring station designed for use in areas where Fruit fly (*Drosophila*) and a variety of other flying insects are a problem e.g. restaurants, bars and cafés
- Small reservoir (3ml) at the bottom of the monitor means a variety of attractants can be added to maximize the monitor's efficacy
- Patterns of triangular holes allow easy access to flying insects while making inspection quick and easy
- Yellow glue boards for maximum attractiveness to flying insects
- Glue board is simple and quick to change. Mix and match glue boards for use in a variety of situations
- Can be used to monitor various other problem insects, e.g. as Stored Product Moths (*Ephestia* and *Plodia*) using PestWest branded pheromone enhanced glue boards with grid matrix (sold separately)
- These boards can be retained to provide an accurate record of infestation levels and insect types for HACCP audits
- Supplied flat, easy to assemble - one glance monitoring station
- Can be wall-mounted or stood upright on a flat surface
